

MURTAZA ZOAIB

Senior Web Engineer | Full-Stack Development | Systems Integration | Web Security

Karachi, Pakistan | murtaza@5cube.io
[Website](#) | [LinkedIn](#) | [GitHub](#) | [Credly](#)

Professional Profile

Senior Web Engineer and technical lead with more than 18 years of professional practice in computer science and information technology. Experience spans full-stack and SaaS architecture, PHP, Python, JavaScript, APIs, databases, CMS and e-commerce platforms, workflow automation, web security, malware remediation, performance engineering, deployment, and production support. At 215 Marketing, progressed through increasingly senior full-stack engineering responsibilities, beginning as Web Developer/Designer, progressing to Senior Full Stack Developer, and serving as Senior Web Engineer since February 2025, while also leading independent software projects and technical teams. Demonstrated sustained responsibility for architecture, quality assurance, code review, systems integration, security incidents, release coordination, and delivery of business-critical web applications.

Professional Qualifications Summary

Criterion	Candidate Record
Professional field	Computer Science and Information Technology
Professional experience	November 2007-present; more than 18 years
Senior and leadership responsibility	Progressive architecture, production, and technical-leadership responsibility, particularly July 2014-present
Current professional role	Senior Web Engineer, 215 Marketing (full-time independent contractor)
Education	B.S. Computer Science in progress, University of the People; 102 of 120 degree credits satisfied through UoPeople coursework and approved transfer credits

Core Technical and Leadership Areas

Full-Stack Web Engineering | SaaS Product Architecture | Software and CMS Architecture | PHP | Python | JavaScript/TypeScript | React | Vue | Nuxt | Node.js | AWS | REST APIs | Webhooks | SQL/NoSQL Databases | WordPress | WooCommerce | Shopify | BigCommerce | Workflow Automation | Website Security | Malware Analysis | Performance Engineering | Core Web Vitals | Technical Leadership | QA and Code Review | Production Operations | Generative AI and Prompt Engineering

Significant Performance Highlights

- **Jul 2014-Present - 215 Marketing:** Worked continuously as a full-time independent contractor, beginning as Web Developer/Designer, progressing to Senior Full Stack Developer, and serving as Senior Web Engineer since February 2025. Held sustained and increasing responsibility for architecture, full-stack delivery, API development, workflow integrations, security remediation, performance engineering, production escalation, quality assurance, and coordination of developers and designers.
- **2025 - BookTrip.AI:** Served as Lead Technical Architect and Engineering Lead for an AI-assisted travel-booking platform operating through a website, WhatsApp AI chatbot, and Telegram bot. A centralized Django/MySQL backend integrates travel suppliers and external APIs, synchronizes cart and booking state across channels, and supports administration, monitoring, human escalation, reporting, and audit controls. Led architecture, technical decisions, sprint planning, integration strategy, code review, release coordination, and production readiness.
- **2025-Present - QuotelyPro:** Through 5CUBE, led product architecture and technical delivery of a live web and Android quotation and invoicing SaaS using React, Node.js, and AWS. Implemented live previews, customizable templates, PDF export, WhatsApp and email sharing, reminder workflows, cloud synchronization, client and product management, billing, and mobile-first interfaces. Reached three paying beta customers by 2026.
- **2023-2025 - Web-Based ERP Management Platform:** Led architecture, full-stack delivery, and later implementations for multiple client businesses across sales, purchasing, banking, general ledger, inventory, administration, dashboards, and reporting. Built the Angular frontend, Django REST APIs, JWT-based access, MySQL data layer, cross-module synchronization, error handling, caching, and pagination.

- **2011-2024 - Upwork/oDesk Independent Practice:** Completed 198 jobs and 14,415 logged hours, maintained 100% Job Success and Top Rated Plus status, which Upwork identifies as representing the top 3% of performers on its platform. Received oDesk Top 5% recognition in 2013 and completed a 452-hour Development Team Lead contract in 2015. The account ended in December 2024; archived records documenting the professional history have been retained.

Professional Experience

Senior Web Engineer | 215 Marketing | Remote / Philadelphia, USA

Feb 2025-Present

- Lead end-to-end architecture and delivery for CMS, e-commerce, custom PHP, and integrated web systems.
- Design workflow automation and data pipelines connecting Asana, HubSpot, Synuma, Zapier, Make, webhooks, third-party APIs, databases, and custom endpoints.
- Develop Python tools for malware detection, malicious-code inspection, repetitive analysis, and investigation support.
- Serve as a primary escalation resource for vulnerabilities, malware remediation, codebase hardening, critical production incidents, Core Web Vitals, and performance optimization.
- Build proprietary PHP plugins and reusable components focused on security, maintainability, database efficiency, specialized functionality, and reduced platform overhead.

Web Developer/Designer → Senior Full Stack Developer | 215 Marketing | Remote / Philadelphia, USA Jul 2014-Jan 2025

- Developed and optimized full-stack web applications and custom websites while coordinating a small technical team.
- Supervised developers and designers and established practices for testing, code review, troubleshooting, release support, and resolution of critical issues.
- Developed secure Python and PHP APIs and integrated internal databases, external platforms, CRM systems, project-management systems, and automation services.
- Delivered custom themes, plugins, responsive interfaces, and e-commerce solutions across WordPress, WooCommerce, Shopify, BigCommerce, Wix, Squarespace, Magento, Joomla, and Drupal.

Founder, Owner and Technical Lead | SCUBE | Karachi, Pakistan / Remote

Jul 2019-Present

- Founded and operate an independent software-development practice delivering custom web applications, SaaS products, workflow automation, system integrations, and multi-channel software platforms.
- Hold responsibility for client requirements, solution architecture, technical decisions, implementation planning, task coordination, code review, quality assurance, release preparation, and delivery.
- Lead solution architecture, product planning, technical coordination, quality control, and delivery for QuotelyPro; BookTrip.AI, an AI-assisted travel-booking platform operating through a website, WhatsApp AI chatbot, and Telegram bot, with travel supplier and external API integrations; and Controlstead, currently under development.

Independent Full-Stack Developer | Upwork / oDesk | Remote

Jul 2011-Dec 2024

- Delivered 198 client engagements across full-stack development, Python, PHP, JavaScript, React, Vue, Node.js, Django/Flask, APIs, CMS, e-commerce, mobile interfaces, QA, and technical support.
- Accumulated 14,415 logged hours, maintained 100% Job Success, and earned Top Rated Plus status, which Upwork identifies as representing the top 3% of performers on its platform; received oDesk Top 5% recognition in 2013.
- Completed a 452-hour Development Team Lead engagement in 2015. The account ended in December 2024; archived records documenting the professional history have been retained.

Web Developer / SEO Specialist / Team Lead | Freelance engagements, including 215 Marketing | Remote

Jun 2011-Jun 2014

- Delivered PHP, WordPress, e-commerce, web design, SEO, analytics, and technical support while coordinating project execution and client delivery.

Additional Leadership and Technical Roles

Role	Organization	Dates
Web Development Team Lead	eMarketing Concepts	Feb 2016-Mar 2018
Director of Web Development	Unik Impact	Jul 2012-Dec 2017
Senior Web Developer / Team Lead	CreativeHaus	Oct 2014-Nov 2015
Project Manager / Web Developer / Team Lead	Digital GTA Inc.	Jun 2011-Sep 2014
SEO Specialist / Mobile UI Developer / Mobile Apps QA	Objectified Software Inc.	Feb 2011-Feb 2013
Founder / Web Developer / SEO Specialist	PakBridge.com	Nov 2007-Jun 2012
SEO Specialist / Senior PHP Developer / E-Learning Team Lead	GreyLines Studio	Jul 2010-Jan 2011

Note: Some roles overlapped in calendar time. They are included to show concurrent responsibilities and breadth of practice; overlapping periods are counted only once in the total years of professional practice.

Selected Technical Projects

BookTrip.AI - AI-Assisted Multi-Channel Travel Booking Platform (2025). Lead Technical Architect and Engineering Lead for a website, WhatsApp AI chatbot, and Telegram bot connected to a centralized Django/MySQL backend with travel supplier and external API integrations, synchronized cart and booking state, administration, monitoring, human takeover, reporting, and audit controls.

QuotelyPro - Mobile-First Quotation and Invoicing SaaS (2025-Present). Through 5CUBE, led product architecture and technical delivery of a live React/Node.js/AWS platform with web and Android experiences, live quotation and invoice previews, customizable templates, PDF export, WhatsApp and email sharing, reminder workflows, cloud synchronization, client and product management, billing, and responsive mobile-first interfaces. Reached three paying beta customers during the 2026 beta phase.

Controlstead — Digital Control and Recovery SaaS Platform (2026–Present). Founder and Product Architect for a provider-neutral SaaS platform under development to help small businesses verify, recover and transfer control of critical digital assets. Responsible for product definition, system architecture, multi-tenant SaaS planning, control-verification workflows, evidence models, recovery-readiness concepts, technical roadmap governance and implementation oversight.

Web-Based ERP Management Platform (2023-2025). Led architecture, full-stack delivery, and later client implementations using Angular, Django REST Framework, JWT, and MySQL across sales, purchasing, banking, general ledger, inventory, administration, dashboards, reporting, caching, pagination, and synchronized business workflows.

PakBridge.com Multi-Module Portal (2007-2012). Founded and built a ColdFusion-based portal that included an online resume builder, real-estate and used-car listings, and e-learning and career resources; owned product design, development, deployment, operations, and maintenance.

Selected Publications and Manuscripts

Sole author — “A Dependency-Aware Framework for Administrative Control Verification and Recovery Readiness in Small-Business Digital Infrastructure”. Submitted to the Journal of Cybersecurity and Privacy (MDPI), 2026; currently under peer review.

Education and Selected Professional Development

Bachelor of Science in Computer Science - In Progress | University of the People | Online 102/120 credits satisfied

- Degree in progress; 102 of 120 degree credits currently satisfied through UoPeople coursework and approved Sophia Learning and Study.com transfer credits.
- Selected completed coursework includes Artificial Intelligence, Programming in Python, Programming in R, Data Structures and Algorithms, Discrete Mathematics, Computer Architecture, Database Management, Software Engineering, and Business Communication.

Higher Secondary Certificate - Pre-Engineering | D.J. Government Science College | Karachi 2002

Secondary School Certificate - Computer Science | Karachi Public School | Karachi 2000

Selected Certifications

- IBM - Generative AI Fundamentals Specialization; Generative AI for Software Developers Specialization; Generative AI: Prompt Engineering; Generative AI for Growth Marketing (2025).
- Google - Google AI Essentials; Maximize Productivity with AI Tools (2025).
- Edureka - Generative AI for Automation Specialization; Generative AI and Prompt Engineering Essentials; Generative AI for Workflow Automation (2025).
- Certified Internet Webmaster - TEC Institute.

Professional Recognition and Service

- Certificate of Professional Recognition as Lead Facilitator and Subject-Matter Expert for the GenAI Prompt Engineering Essentials Workshop, 4 January 2026.
- Upwork Top Rated Plus status, representing the top 3% of performers on the platform; 100% Job Success; and oDesk Top 5% recognition (2013).
- Public GitHub repositories include Python/Django, Vue, TypeScript, and JavaScript projects. Contribution history includes 1,016 contributions in 2023 and 882 contributions in 2024.
